

A6 Pressure Relief Valve

The A6 Pressure Relief Valve is ideal for any application where compactness and reliability are critical. The opening and closing pressures are accurately pre-set and repeatable.

A6 Key attributes and benefits:

- Protects the structure from over inflation and excess pressure due to solar heat.
- Approved to ISO 9650 and ISO 15738 as a transfer valve.
- Smooth low profile.
- Rugged and reliable.
- Materials have high UV resistance.
- 100% tested for opening and closing pressures.
- Rapid installation with clamp fitting.
- Operating temperature: -30°C to +65 °C.

Certificate of type approval – SAS S140035

- A filter cap is available to stop debris entering the valve, without affecting the pressure relief function.
- The valve is available in grey, black or white.
- We can provide a black or red plug where a secondary seal is required.
